New postage values

Since October 1st, the value of postage stamps for domestic mail is no longer indicated in euros. Instead of the value, you will find the number 1, 2, 3, 5, or 7 in a circle on the stamp. This number represents the base rate (currently €0.52) or multiples thereof. In concrete terms, this means:

symbol in the inventory for valuation of the stamps ►	►	①	①	②	③	⑤	⑦	
	►	②	3695	3696	3697	3698	3699	=> first stamps with these indications
	►	③	€ 0,52	€ 1,04	€ 1,56	€ 2,60	€ 3,64	
	►	⑤	▼	▼	▼	▼	▼	
	►	⑦	Standardized shipment for domestic use 0 - 50g					
	►		Non-standard shipment for domestic use 0 - 100 gr					

Non-standard shipment for domestic use 100 - 350 gr

Non-standard shipment for domestic use 350gr - 1kg

Non-standard shipment for domestic use 1kg - 2kg

This way the continuity of your collection is guaranteed!

International postage at multiples of the basic rate

The new postage system is now also available for your foreign correspondence.

MULTIPLE franking for domestic mail has been a success. The rate structure is more transparent, and stamps remain fully valid after a rate change. The Post Office will extend this positive experience to international mail on January 1, 2009. The international rate system was simplified in February 2008 by abolishing non-priority mailing here as well. The way is now open to replace the values (e.g., 0.90) with multiples (e.g., 1).

To distinguish them from domestic rates (circled numbers), international multiples are placed in a square with rounded corners. For European destinations, this is displayed against the European flag. For "rest of the world," the number appears against the globe symbol.

In concrete terms this means:

symbol in the inventory valuation of the stamps ►	►	1	€ 0,80	Basic rate for a standardized shipment within Europe 0 - 50gr
	►	3	€ 2,40	Rate for a non-standard shipment within Europe 0 - 100gr
	►	1	€ 0,90	Basic rate for a standardized shipment for the rest of the world 0 - 50gr
	►	3	€ 2,70	Basic rate for a non-standard shipment for the rest of the world 0 - 100gr

If these rates change, the values on the stamps don't need to change. You can continue using your stock without having to add small denominations.

Philatelists can seamlessly integrate their "national" collection with their "international" stamp collection. Incidentally, all stamps issued after April 16, 1962, remain valid for postage.

New postage values

© bpost

Since February 9, 2008, the value of postage stamps for domestic mail has been increased. The number represents the basic rate (currently €0.69) or multiples thereof. In concrete terms, this means:

►	①	①	②	③
►	②	€ 0,59	€ 1,18	€ 1,77
►	③	▼	▼	▼

⑤ and ⑦ are abolished

Standardized shipment for domestic use 0 - 50g

Non-standard shipment for domestic use 0 - 100 gr

Non-standard shipment for domestic use 100 - 350 gr

Non-standard shipment for domestic use 350gr - 1kg: to be assembled

1 1 4042

This stamp has a value of 1 and is intended for elections
